Remote working policy

Staff at Harbour Logistics may work from home for up to three days a week. Each manager agrees the pattern with their team, and the warehouse rota always comes first.

Home working is a privilege, not a right. It can be paused during the busy season from November to January.

Equipment and expenses

The company lends every home worker a laptop and a headset. Broadband costs are not repaid.

Keep company equipment away from children and pets, and report any damage to the IT desk within two working days.
